

Drummond Company Inc. Purchases an Immersive Technologies Simulator for Operations in Colombia

*Utah USA, February 8, 2005
For Immediate Release*

Drummond Company, a major United States coal producer, with a world class operation in Colombia has committed to invest in the latest operator training, safety and productivity technology via an Immersive Technologies Advanced Equipment Simulator.

The simulator will be used to train and assess operators at their Mina Pribbenow operations in Colombia to further improve safety and increase productivity.

“The delivery of this simulator into Colombia sees Immersive Technologies’ mining simulators in 14 countries around the world”, said Skip Sullivan, Vice President - North & South America.

“Immersive Technologies is proud to provide our world leading simulator training technology to Drummond and we look forward to developing a strong ongoing relationship”, said Skip Sullivan.

About Immersive Technologies

Established in 1993, Immersive Technologies is a provider of leading training simulator technologies that increase operational efficiency, reduce risk and improve productivity in the mining and earthmoving sectors. Immersive Technologies employs about 85 people in Australia and the United States with simulators in 14 countries.
