

Immersive Technologies Provides Fully Staffed On-Site Training Solution at Large Copper Mine in Chile

17 December 2014

Immersive Technologies, the global leader in operator workforce development solutions for mining announced today that a major multinational mining company has chosen to integrate a fully staffed on-site training solution at one of its mines near Santiago, Chile.

Over this three year engagement, Immersive Technologies specialists will carry out operator risk assessments, training and drive continuous improvement projects targeted at specific mine operational performance gaps. The mine has also engaged Immersive Technologies to provide management reporting and administration of training materials to standardize the training process and ensure that the program achieves a reduction in operational risk, reduction in operating cost and an increase in site productivity. These services will be delivered with the aid of the industry's leading operator training technology, the PRO3-B Advanced Equipment Simulator, also supplied by Immersive Technologies.

In 2001 the first Immersive training solutions were provided from the Immersive Technologies' Latin American regional sales and support office and since then over 60 sites and training schools in the region have adopted Immersive Technologies as a partner in addressing the growing training demand.

Vice President Latin America Manfredo Manfredi stated "Immersive is in a unique position to provide the best trained, best equipped and most effective specialists to manage your operator training program. Because we have developed the most widely used continuous improvement and operator training methodology in mining, we can provide staff that will immediately add value to your organization's bottom line results."

These on-site specialists are not easily available from the industry. Each candidate is trained in Immersive's exclusive technology integration and operator training methodology. They are also embedded with Immersive's global support network and have direct access to exclusive intellectual property for mine operator training. The end result is a value added service that is fully backed by Immersive Technologies, and their demonstrated capability to reduce mining risk.

Fully staffed on-site training from Immersive Technologies will be deployed at a large Chilean copper mine. Immersive Technologies specialists will carry out operator risk assessments, training and drive continuous improvement projects targeted at specific mine operational performance gaps.

##

About Immersive Technologies

Immersive Technologies is the world's largest, proven and tested supplier of surface and underground Advanced Equipment Simulators to the global mining industry. The company has achieved this unique position by focusing on its mission to make every mining and earthmoving equipment operator in the world safer and their employer more profitable through its simulation technologies. Simulation Delivering Safety and Productivity

Email: enquiries@ImmersiveTechnologies.com

Web: www.ImmersiveTechnologies.com

Technologies' Advanced Equipment Simulators are helping hundreds of mining companies around the world to increase their equipment operators' safety and site profitability through effective simulation training.

Immersive Technologies provides its customers with the most effective Advanced Equipment Simulators available. This is made possible through the formal exclusive licensing and technical information alliances Immersive has established with the leading Original Equipment Manufacturers (OEM), including: Caterpillar, Hitachi, Komatsu and Liebherr. These unique alliances provide Immersive Technologies with exclusive access to the OEM's proprietary and confidential machine technical information that is required to correctly simulate the OEM's machines and is not available through other public or dealer channels.

With advanced simulators modules deployed in 39 countries, Immersive Technologies is dedicated to provide outstanding service. To deliver on this commitment the company has customer sales and support offices located close to its customers in Perth and Brisbane Australia, Salt Lake City USA, Calgary, Ottawa & Vancouver Canada, Monterrey Mexico, Lima Peru, Santiago Chile, Bochum Germany, Johannesburg South Africa, Jakarta Indonesia, Kolkata India and Riyadh, Saudi Arabia.

Immersive has the global mining experience, innovative technology, product range, OEM relationships, proven support commitment and industry vision to partner with you to ensure your simulator training solution delivers the significant results you expect.
