

SimControl 5.4

IMMERSIVE TECHNOLOGIES

EXPECT RESULTS

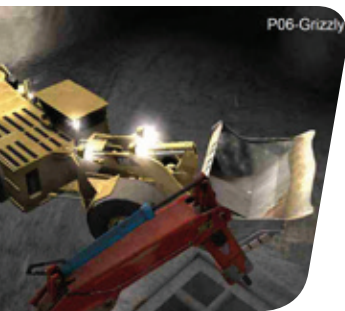

- MAJOR DRAGLINE IMPROVEMENTS
- CUSTOMIZED TRUCK PAYLOADS
- CONFIGURABLE GROUND HARDNESS

Truck Enhancements

- The payload for all haul trucks can now be customized to suit individual site configurations.
- Train to safely respond to low traction situations when driving uphill with a new event.
- Dramatically demonstrate the size of haul truck blindspots.

Digging Machine Enhancements

- Major improvements to dragline dynamics and ground materials.
- New configurable ground setting for hydraulic excavators can be used to make the ground harder or softer when digging.
