

# SimControl 5.6

IMMERSIVE TECHNOLOGIES

EXPECT RESULTS

- SIMCLOUD AVAILABILITY EXPANDED
- IMPROVE YOUR JUMBO OPERATORS' PRECISION

## SimCloud

SimCloud is a web-based product that allows easy and secure access to your simulators, enabling remote support services and visibility over your local and global simulation training activities. SimCloud enables:

- Remote support services
- Remote monitoring of training programs & simulator asset utilization
- Comparison of operator performance across multiple sites

## Jumbo Drill Enhancements

- Train parallelism with new Drill Guide assistants
- Program events based on hole number and depth
- Evaluate operators with new SimMetrics task reports
